9.5 CGPA

May 2018 – May 2019

### Bachelor Of Technology

*KL University*  
9.36 CGPA

August 2021 – June 2025

## Professional Experience

### JPMorgan Chase Code For Good 2023

Participated in JPMorgan Chase Code for Good virtually in, worked as backend developer in the team for the Problem statement for a NGO during hackathon and created schemas to render user data in the frontend pages and to edit by authorized people from the organization.

Conducted sessions on *MERN* stack as Director of *MERN* stack at KL University-Software Engineering Associatives Club.

## Skills

— • Java • Python • JavaScript • MySQL • Flutter • Mongo Db • Express Js • FlexBox • React Js • Node Js • Django • PostgreSQL • Aws • Firebase • Google Cloud • Git • Github • Docker • Jenkins • Figma • BitBucket

## Certificates

- Aws Cloud Practitioner
- Node JS
- Responsive Web Design Using Flexbox
- Avatrix Multi Cloud
- JavaScript Essential
- Build Your Static Website

## **Projects**

---

### **PhotoVerse**

#### *Post Feature*

- Built an real time featuring real-time post updates with Pusher for real-time changes
- Designed a modern and intuitive user interface with React and Material-UI
- Utilized MongoDB for scalable data management, enabling users to upload and view posts instantly

### **SwipeMate**

#### *Swiping Feature*

- Developed an application with card-swiping functionality using react-twitter node package
- Implemented a high-performance backend using Node.js ,Express and MongoDB
- Optimized image loading with Redis for caching , ensuring Fast and Responsive interactions

### **UiChatZone**

#### *Messaging Feature*

- Developed a whatsapp clone with real time messaging using React,Node js, MongoDB
- Implemented Pusher for real-time messaging delivery to create a responsive chat experience
- working on enhancing messaging features, performance optimization and refining ui components

### **ChatHive**

#### *like group chatting*

- Developed a Flutter Application hosted on Firebase,enabling user registration, login, group creation, and messaging functionality
- implemented Firebase Authentication for user authentication and Firebase Firestore for real-time database functionality

### **TaskZen**

#### *Task Management Feature*

- Created an Android app using Flutter and Hive local storage to manage daily tasks
- Built based on a deep understanding of Flutter Stateless and Stateful widgets
- Applied Stack data structure logic for task organization and management

### **FitTrack**

#### *Health Logging Feature*

- Built a Flutter application with Hive local storage for personal workout tracking
- Integrated a heat map calendar for visualizing activity patterns
- Gained strong UI/UX experience with complex Flutter components and layouts
